

EyeOnWater Login Instructions

In 2016, Eastsound Water installed new water meter reading technology. The new water meters use a cellular data signal to “report” water use to a cloud-based database.

There are many advantages to this new “tech”, but among the most significant is the water user interface called “EyeOnWater”. This webpage, or app, allows water users to monitor their water use, and *program alerts for leaks on your property*. No more peeking in a dirt meter box to check your water use!

To take advantage of this new capacity, you will have to establish an account. This is likely a familiar process, similar to any other web-based account registration. A step by step “HOW TO” follows:

Step #1 Go to <https://eyeonwater.com>

Step #2 Select “Create Account” below the “Sign In” box. This will bring up the registration page.

Step #3 Enter the Eastsound Zipcode (98245)

Did you know?

In 2006, coal power plants in California produced 46,235 GWh of electricity and required over 140 billion gallons of water for cooling.

My EyeOnWater Account
